Huntley Disposal Expands Dumpster Rental Options Across the Kansas City Metro

September 15, 2026

September 15, 2026 -
Huntley Disposal, a family-owned waste management provider serving the Kansas City metro area since 1986, has expanded the range of dumpster sizes available to homeowners and contractors throughout the region. The company now offers five container sizes designed to accommodate everything from small home cleanouts to large construction projects.

The expanded lineup includes 10-yard, 15-yard, 20-yard, 30-yard, and 40-yard containers. The 10-yard option is suited to small-scale cleanups, while the 15-yard size fits typical home remodels. Mid-sized projects are served by the 20-yard container, and the 30-yard and 40-yard units address large-scale construction and demolition work. Standard rental periods extend up to seven days, with additional time and weight available for projects that require longer scheduling.

The move reflects continued growth in residential renovation and construction activity across the metro. By broadening its selection of Dumpster Rentals, the company aims to match container capacity more closely to

the scope of each job, reducing the likelihood that customers pay for space they do not need or run short during larger undertakings.

"Every project has a different footprint, and matching the right container to the work makes cleanup far more straightforward," said David Finke, spokesperson for Huntley Disposal. "Offering a full range of sizes means a homeowner clearing out a garage and a contractor managing a full renovation can both find a container that fits the task."

Alongside the container sizes, the company provides roll-off dumpster service designed for scheduled delivery and pickup, helping job sites remain clean and organized throughout a project. The roll-off containers accommodate a broad mix of materials, including construction debris, yard waste, furniture, appliances, and general household refuse.

Huntley Disposal also handles the removal and disposal of specific items that many standard trash services will not accept. These include refrigerators, mattresses, televisions, electronic waste, hot tubs, and furniture, as well as foreclosure cleanouts and construction waste removal. The company coordinates recycling for eligible electronics and appliances as part of its disposal process.

The expanded Kansas City Dumpster Rentals service covers a wide geographic area that includes Kansas City, Overland Park, Lee's Summit, Saint Joseph, Gladstone, Liberty, Olathe, Parkville, Platte City, and Smithville, among other communities. Projects located outside the standard service area may be accommodated on a case-by-case basis, with adjustments made according to distance.

"The metro has changed a great deal since the company started in 1986, and demand for flexible waste solutions has grown with it," Finke said. "The goal has always been to keep the process simple and dependable for the people and businesses in this region."

Huntley Disposal is a family-owned dumpster rental and waste disposal company based in Smithville, Missouri, serving the greater Kansas City metropolitan area. The company provides roll-off container rentals in multiple sizes, along with waste removal and recycling services for residential, commercial, and construction projects. Since 1986, Huntley Disposal has focused on providing straightforward waste management for communities throughout the region.
